

Email Template

Dear (participant),

We hope this email finds you well! We are second-year students from Breda University of Applied Sciences, conducting a study on *how third-party AI tools impact employees in small and medium-sized enterprises (SMEs)*. We're reaching out because we believe your experience can provide valuable insights into how AI is shaping workplace environments in terms of performance and satisfaction, and could help inform better practices for SMEs.

We would like to invite you to a 30-40 minute interview, either online via Zoom or in person, to hear about your experience working with AI tools. Whether AI has improved your work or created new challenges, your input is essential in helping us understand its real-world effects on employees like you.

If you're interested, please reply to this email with your availability and interview preference (online or in person). We'll then provide a consent form for the study, along with a short survey we would like you to take as a prerequisite.

We've also attached a research information letter with more details about the study. Please take a moment to read it, and let us know if you're interested in participating.

Your perspective will help shape future decisions around AI in SMEs, benefiting both businesses and employees. We hope to hear from you soon!

Best regards,

The DataScienceAI-2 Research Team
Breda University of Applied Sciences
