

STRENGTHS

- Technical implementation (NLP, ML, coding)
- Documentation

WEAKNESS

- Legal consideration (ILO3.5)
- Ethical consideration (ILO3.5)
- Project management
- Presentation skills

SWOT

OPPORTUNITIES

- Opportunity to improve my weakness through my teammates.
- Implement an end-to-end project that takes the input video and outputs the transcription + translation + emotions.
- Create a GUI implementation (Optional)

THREATS

- Working with the second language for translation section of project.

STRENGTHS

- Leadership skills
- Providing feedback
- Managing tasks
- Attention to detail
- Data analysis
- Translation of data into insights
- Presentations

WEAKNESS

- Evidencing my work
- Coding
- Modelling
- Procrastination
- Getting distracted easily

SWOT

OPPORTUNITIES

- Practicing reading academic articles and utilizing the newly gained knowledge
- Learning about NLP
- Learning to cooperate with new team-mates
- Improve my evidencing skills
- Improve my time-management since I will have to work on the retake of Block B

THREATS

- Lack of communication
- Evidence all over the place
- Not fully utilizing time during DataLabs
- Retaking Block B
- Using multiple platforms to communicate
- Not being able to agree on a team approach

STRENGTHS

- Task Management
- Goal oriented
- Communication
- Fast Learner and understanding concept
- Presentations
- Organisations
- Disciplined
- Honest feedback
-

WEAKNESS

- Coding with assistance
- Doesn't like to use the server
- Social Media

SWOT

OPPORTUNITIES

- Working with new teammates
- Learning new topics
- Developing skills
- Learn about different cultures

THREATS

- Insufficient data set
- Unstable communication and misunderstanding
- Biases opinions
- Parties
- Retake Block B - improve grade
- Lack of communication with stakeholders

Availability

- Regular Check-ins: We will have standups at least three times a week: during the two Datalab sessions (Monday and Wednesday) and on Fridays. These will be used to discuss progress, share feedback, and address any challenges.
- Group Chat: We will use the team group chat for daily communication. This platform will be used for both project-related discussions and casual conversations. All team members should check the group chat regularly and respond in a timely manner.
- Document Sharing: All project-related documents will be shared in the team group chat, ensuring everyone has access to the latest materials and updates.
- GitHub for Project Work: We will use GitHub for all project-related tasks. This will serve as a centralized space for collaboration on code, documentation, and other project assets.
- Clear and Direct Communication: If a response is needed urgently, team members should directly message the person involved. If a message is left unanswered, follow up within 24 hours.

Expectations

- Soheil, Viki: Available during the whole week including weekends, with flexibility for asynchronous work as needed. We will prioritize this block's tasks and be responsive during work hours.
- Ron: As Ron is not available on weekends during the day due to work commitments, we will ensure not to schedule critical group tasks on weekends or, if absolutely necessary, focus on independent work that does not require real-time collaboration.
- On-Demand Availability: For urgent matters or last-minute changes, we'll utilize the group chat to keep everyone informed. All team members should aim to be reachable for at least 2 hours during the workday

Communication

- Active Participation: Every team member is expected to actively contribute to group discussions, tasks, and deliverables. Regular attendance at Datalab days (Monday and Wednesday) is essential for collaboration.
- Task Ownership and Accountability: Each team member will be responsible for specific sections of the project. Accountability is crucial to ensure deadlines are met. Ron will mostly be responsible for documentation and evidencing. Soheil will be responsible for the complex technical parts. Viki will be helping out all around. If challenges arise, communicate early so the team can assist.
- Time Management: With the additional retake of Block B for some team members, proper time management is critical. Tasks will be tracked using Trello, and deadlines should be respected. Any issues with meeting deadlines should be communicated ahead of time.
- Documenting Work: Each member should document their work clearly, regularly and thoroughly.
- Proactive Approach: Each member should take the initiative to help push the project forward. This includes offering help when others are struggling and ensuring the team is on track with deadlines.
