

AI Project Canvas

Title: Accident Hotspot Identification Dashboard

Data

Which data do you need?

- ANWB (Safe Driving) Data - driving incidents, including speeding, braking, turns, acceleration
- KNMI Weather Data - precipitation, temperature, and wind conditions
- BRON (Accidents) Data - traffic accidents, including the date, time, location, severity, and conditions
- Argaleo Greenery and Road Data

Skills

Which skills do you need for development?

- Development Skills
- Communication Skills
- Project Management
- Infrastructure Knowledge
- Machine Learning
- Data Science and Analytics
- Visualization and Programming

Output

Which key metric are you optimizing for?

- Accurate data
- Fast delivery
- Transparent output
- Clustering Accuracy
- Prediction Accuracy
- User Satisfaction

Value Proposition

What is the value added by your project?

- Actionable Road Insights: Providing actionable insights into accident hotspots to help law enforcement and city planners proactively prevent incidents.
- Increased Efficiency: Giving our end users the best insight for efficient road navigation.
- Improved safety: By providing road safety and risk statistics we increase the likelihood of a safe trip for our end users.

Integration

How will the project be integrated?

- Police/Authorities Systems
- Interactive map/dashboard with Folium or Plotly
- Database Connectivity

Stakeholders

Who are the key stakeholders?

- ANWB
- Police Department
- Breda Municipality
- Traffic Management Authorities
- Data Providers

Customers

Who are the end customers?

- Police Officers and Traffic Enforcement Units: Utilize the dashboard for strategic resource allocation.
- Breda Municipality Officials: Use insights for policy decisions and infrastructure improvements.
- Citizens of Breda: Indirect beneficiaries who experience increased road safety.

Cost

What costs will the project incur?

- Cloud Services: Expenses for cloud storage, server uptime, computing resources, and database management.
- Software and Tools: Licenses for development tools, libraries, and software.
- Maintenance: Ongoing costs for system maintenance, updates, and technical support.
- Training and Workshops: Expenses for training police officers and stakeholders to use the system effectively.

Revenue

How will the project generate revenue?

- Subscription Model
- Consulting Services
- Licensing Fees
- Service Contracts
- Data Monetization
- Advertisement and Sponsorship
- Grants and Government Funding
